

Genetically Modified Organism (GMO) safety & post market monitoring conference

March 6-8th, 2012

Conference

A strategy for the monitoring of GMOs following their introduction to the market is important to ensure safety and early detection of unexpected adverse effects. The GMSAFOOD conference on genetically modified organism safety and post market monitoring is aimed at the state-of-the-art approaches to evaluating the safety of authorized GMOs. Leaders in the field will present on safety in the population at large upon the introduction of new foods including GMOs.

Topics

- GMOs - in animal studies, the food chain, potential allergenicity, biotechnology
- Post market surveillance - epidemiology for, an ILSI Europe opinion, political and regulatory aspects, biomarker approach

Program

- Keynote lectures
- Small group theme discussions
- Panel discussion with scientists and stakeholders
- Public question & answer session

Venue

Medical University of Vienna
Spitalgasse 23, Rectorate meeting room
1090, Vienna, Austria
